

CONNECT

Software architecture

Concepts

The application renews the old-fashioned event manager systems, and extends them with a wide variety of features.

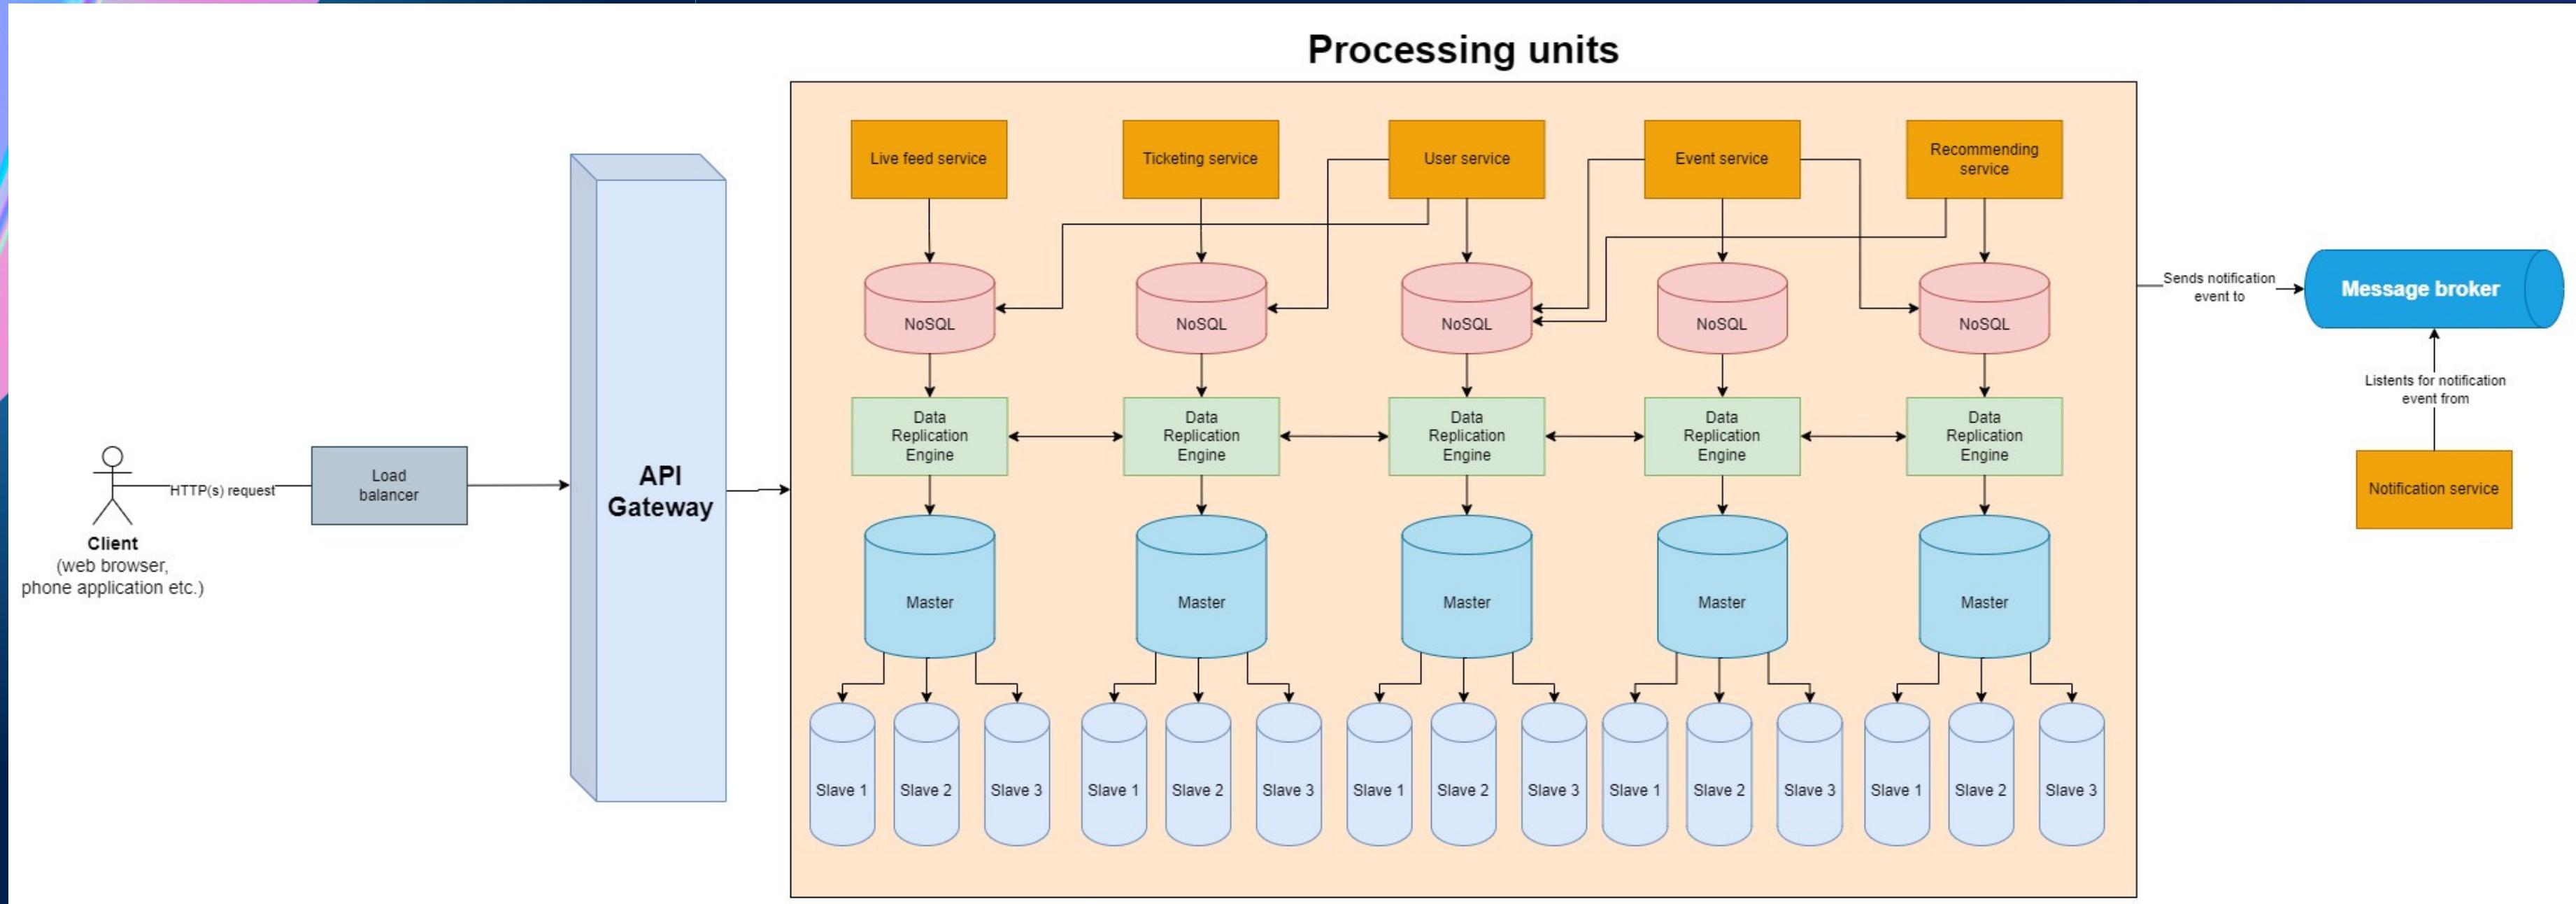

Processing units

- **Live feed** service
- **Ticketing** service
- **User** service
- **Event** service
- **Recommending** service
- **Notification** service

Bottlenecks

- Up to date content all the time on the feed
- Handling huge data operations
- Handling large user base
- Purchasing tickets simultaneously
- Scalability
- Data loss

Solution

Thank You
